

# S.T.E.P Team

## What is STEP?

We are a mental health program in Logan School to help support students so that they can be successful in the school setting. A student may experience emotional, behavioral, social or peer related struggles in school. Our team is unique because we are school district employees who focus on helping the child by supporting teachers and staff in school as well as by supporting the child and the family. We can provide individual, group, or family therapy, behavior support planning, case management or family peer support to the family. We support the family AND the child!

**Nicole Guessford; LCSW**  
**Clinical Coordinator**

As the Clinical Coordinator I oversee the STEP Program and I assure that STEP Program is meeting the needs of our students and families in our Logan Community. I provide individual, group and family therapy to our STEP students. I provide classroom support to teachers I also am able to provide services in a family's home upon request and over the summer.

**Shelby Coleman**  
**Family Peer**

As a Family Peer Specialist at Logan, I assist parents in addressing their child's social, emotional, and social service needs. As a member of Logan STEP team, I assist with providing support for unmet physical, living situations, behavioral and mental health needs to help sustain the child and family.

**Davonja Thomas, MS**  
**Case Manager**

As Logan's Case Manager, I'm here to help clear the way for student achievement, encourage good behavior, and help students develop socially. I will intervene when your child faces behavioral, physical, or mental health challenges and connect your family to resources and services to help achieve greatness.

**John Wehler; LSW**  
**School Based Behavioral Consultant**

Mr. John is the team's School Behavioral Consultant. Mr. John's main role is to help support staff and students and create an environment that fosters emotional and academic growth by teaching trauma-informed behavioral strategies that can be used at home and at school. The SBC also provides individual/group therapy and pushes into the classroom to support teacher coaching and behavior planning.
