

Welcome to Autistic Support

K-2

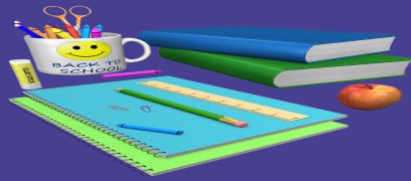

My name is Ms. Biggs and I am so excited to be your child's autistic support teacher. Kindergarten through 2nd is a special time where children experience great social, emotional, and cognitive growth. As we continue to adapt to the changes of the past school years, I know that we will make the very best of the 2022-23 school year. It is going to be a very productive year with many challenges, friends, and discoveries.

I would like to take this opportunity to introduce myself. I am a new special education teacher. I was a paraprofessional for several years in an autistic support classroom and that is where I gained interest in becoming a special education teacher. I have a bachelor's degree in special education and early childhood education. This is the beginning of a new educational journey and I plan to help your child reach their highest goals this year.

As we start the new year off in 2022-23, please know that I am open to questions, concerns, and conversations. The best way to get in contact with me is through my email.
